AWARDS

Received Full Merit Scholarship

PROFILE

I am a dedicated MERN stack developer with a strong foundation in building dynamic, responsive web applications using MongoDB, Express.js, React.js, and Node.js. Passionate about creating seamless user experiences, optimizing performance, and developing scalable, efficient solutions.

PROJECTS

Sprintify (FYP) <https://github.com/Nida506/Sprintify>

- Developing a MERN-based project management website featuring task boards, drag-and-drop functionality, real-time updates, and team collaboration tools to streamline workflow management.
- Implementing user authentication, integrated chat, and video meetings, ensuring seamless communication while providing a visually intuitive interface for tracking tasks and project progress.

NetWorkHub <https://github.com/Nida506/NetWorkHub>

- Developed a full-stack MERN NetWorkHub website with user authentication, secure payment processing, and real-time chat.
- Enabled users to view profiles, send connection requests, and manage friend requests for an interactive experience.

TALVA <https://website-image-gallery-m4wh.vercel.app/>

- Developed a full-stack project displaying GitHub-hosted images with search by name and category. Integrated Google Analytics, enabled image downloads, and ensured a fully responsive design.

Wander City <https://github.com/Nida506/wanderCity>

- Developed a full-stack project with user authentication, allowing users to explore cities and manage a list of visited places.
- Enabled users to add cities via the map, remove them, view details, and navigate to Google for more information within a fully responsive design.

QuizTime <https://quiz-time-eight.vercel.app/>

- Developed QuizTime, a React-based website where users can take and retake quizzes with customizable options like category, number of questions, and difficulty level.
- Designed a dynamic and responsive interface to enhance user engagement and provide a seamless quiz experience.

MoviePlex <https://movie-website-lc3q.vercel.app/>

- Developed MoviePlex, a React-based website allowing users to search for movies, rate them, and manage their watched list.
- Enabled users to view detailed movie information with a seamless browsing experience for better engagement

EDUCATION

Bachelor of Information Technology
University Of Punjab (PUCIT/FCIT)

2021 - 2025
3.5 CGPA
